GroupDocs.Redaction for .NET

GroupDocs.Redaction for .NET is a powerful API designed to redact classified or sensitive data from a variety of document types within your .NET applications. It supports multiple redaction types including text, metadata, annotations, and image redactions. The API also integrates with OCR engines for redacting text within images and provides the ability to remove pages and embedded images, ensuring the comprehensive redaction of confidential information. GroupDocs.Redaction is highly versatile, supporting a wide range of document formats, making it an essential tool for any organization dealing with sensitive information.

Text Redactions

Exact Phrase Redaction

Search and redact specific phrases or text strings with case-sensitivity options.

Regex Redaction

Redact text based on regular expressions for flexible text matching.

Right-to-Left Support

Redaction of right-to-left text such as Arabic and Hebrew.

Image Redactions

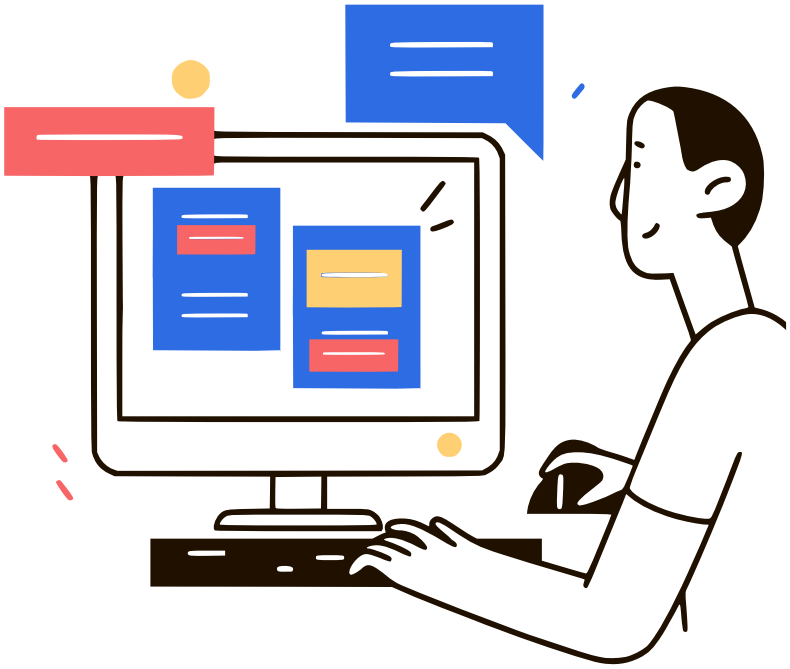

Image Area Redaction

Cover specific areas of images, such as headers or footers, with a colored box.

Embedded Image Redaction

Redact embedded images in documents, including PDF, Microsoft Office, and OpenOffice files.

EXIF Data Removal

Remove metadata (e.g., EXIF data) from images, acting as an "EXIF eraser."

Annotation Redactions

Delete Annotations

Remove annotations, comments, and other markup from documents.

Redact Annotation Text

Redact sensitive data in annotations while keeping the annotations intact.

Metadata Redactions

Erase Metadata

Remove all metadata from a document, such as author, date created, and comments.

Metadata Search Redaction

Remove sensitive information from metadata fields using regular expressions.

Page Redactions

Remove Pages

Remove specific pages from documents such as PDFs, slideshows, or spreadsheets.

Page Area Filters

Apply redactions to specific areas on a page using coordinates.

Rasterization

Convert to Raster Images

Redact sensitive data and save documents as raster images, making all data unsearchable.

Document Saving Options

Save redacted documents in either original format for further editing or in raster format for increased security.

File and Document Information

Document Info Retrieval

Retrieve metadata and page counts for any document format.
